

Test Plan

Project Name: E-commerce Website Testing

Prepared By :Asmaa AbdelNasser

Version:1.0

Data:17/6/2026

OBJECTIVE

The objective of this Test Plan is to verify that the E-commerce website functions correctly, including login, product browsing, cart functionality, checkout process, API responses, and database validation.

In Scope

- Login and Logout functionality
- Product listing and search
- Add to cart and remove from cart
- Checkout process
- API Testing using Postman
- Database validation using SQL
- Automation testing using Selenium

Out Scope

- Performance testing
- Security testing

Test Strategy

The testing will include:

1. Manual Testing for functional requirements
2. API Testing using Postman
3. Database Testing using SQL queries
4. Automation Testing using Selenium WebDriver

Test Environment

- Browser: Google Chrome / Edge
- Operating System: Windows
- Tools: Postman, Selenium, GitHub
- Languages: SQL, Java (or Python if you used it)

Test deliverables

- Test Plan Document
- Test Cases Document
- Bug Reports
- API Testing Collection (Postman)
- SQL Queries File
- Automation Test Scripts (Selenium)

Entry Criteria

- Application is accessible and stable
- Test environment is ready
- Test data is available

Exit Criteria

- All critical test cases are executed
- Major bugs are fixed
- No blocker issues remain

Risks

- Application downtime
- Missing or incomplete test data
- API failure or instability

Timeline

- Manual Testing: 2–3 days
- API Testing: 1–2 days
- SQL Testing: 1 day
- Automation Testing: 3–5 days
